

Instructions:

We will work on the Sugar Jar, Peppermint, Cupcake Stand, Tree Cookie, and Apron #3 blocks in class. More if we have time, starting with the Mixer blocks and the Whipped Cup.

We will discuss/demonstrate squaring up blocks and making the pinwheel blocks.

Prior to class, cut out your background blocks and fuse Shape Flex to the back of each of them. The background blocks are listed on pages 3-5 of the directions, i.e. Peppermint #3, Background. Sprinkle with water or Best Press when you fuse. The Shape Flex will shrink a little and that's ok. The block will be trimmed down later.

There are SVG files included with the Kimberbell directions if you want to cut out shapes with the Scan N Cut. If you do, bring a small iron for fusing in the hoop. I recommend you DO NOT cut the sliver glitter strips for the mixer blocks ahead of time. It is easier and looks better to tack down and trim those.
