

What else can you do with Panels:

Do you have panels and want to do something else other than a quilt, wall-hanging, or table topper? This class is for you. I will present a lot of projects made with different size panels, small- med- and large panels. Bring your own panels and you can select from the numerous projects presented and make one, or however many time allows. I will provide batting scraps and polyester stuffing required for some of the projects. You are encouraged to take pictures, ask questions, and have fun. All level quilters are welcome, and you can start on some cool gifts now and have them for later or make cool projects for yourself! Come join us and find out all the different things you can do will all sizes of panels.
